DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-20,25, and 27-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Maeda et al (US Patent No. 3,889,488). Maeda discloses a refrigerating apparatus having a tank containing a liquefied gas such as nitrogen and comprising: means for vibrating, a container (1) containing foodstuff articles (see column 1), a feeder (2), a tank (3) containing a liquefied gas (5) with a low temperature such as a cryogenic, springs (13,14) act to regulate the vibration means, the articles ascend upwardly on a slanting surface (see column 4) towards an outlet (6), a liquid level detecting means (27), a sensor (31) housed in a pipe (30) and adapted to measure change in temperature, a electromagnetic valve (29) capable of balance the flow of the refrigerate, and furthermore a controller (28) capable of receiving the data for the sensor and leveling device.

Allowable Subject Matter

Claims 36-37 are allowed over the prior art of record.

Claims 21-24, 26 and 31-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
